

“WE ARE INSPIRED BY NATURE”

GENGROUP™

GENGROUP™ is our umbrella company that gathered its companies under its roof in 2020. It is the sun of the system that we have created for modern greenhouse technologies.

GENGROUP™ offers complete solutions for the modern agriculture sector. It provides services during the entire process, from the project stage to the harvest.

It creates the best solution for investors with the knowledge gained over the years in different geographies and climates of the world. It analyzes the demands of the investors very well and offers the best result according to the needs and conditions. The whole project process runs in full coordination of other companies specialized in the system.

Ecological threats such as the food need of the increasing world population, ensuring food safety, protection of natural resources, and global warming increase the importance of production and harvest under the control of high technology, day by day.

With the awareness of all these situations, GENGROU™ will continue to assure its investors with safe, technological and sustainable projects.

M. Gökhan GÖSTERİSLİ
Chairman

mgösterişli

Our brands within the group company.

GREENCON™

GREENCON™ is the company that makes turnkey greenhouse projects. It manages the whole process from the first receiving of the land to the planting of the first seedling with its expert team. GREENCON™ derives its strength from years of experience, high technology infrastructure and the most competent and expert engineers in the sector. Every stage of the project is carried out with the utmost care and attention in order to meet the expectations of the investor fully.

For more information,
please visit www.greencon.com.tr

GENFOG™

GENFOG™ offers modern greenhouse irrigation and fertilization systems as well as fogging and gutter solutions. Our high pressure fogging systems with the first and only integrated disinfection tanks in the world, are fully compatible with all major automation systems. The plant growing beds (gutter) and all suspension systems are produced in GENFOG™ factories with high technology infrastructure.

For more information,
please visit www.genfog.com.tr

GENSEED™

GENSEED™ is our company that is developing healthy, natural and sustainable seeds with the earnings of modern science in Antalya, the capital of modern agriculture of Turkey. We aim to develop efficient seeds in our producer and consumer oriented R&D facilities at international level standards.

For more information,
please visit www.genseed.com.tr

Our brands within the group company.

AGROSTORE™

AGROSTORE™ is our sales company that provides modern greenhouses and all equipment required for modern production. It is also our newest company. With a wide range of products such as spare parts, consumables, plant support systems, disinfectants, fertilizer and harvesting trolley, AGROSTORE™ is at the service for all the needs of the manufacturer.

For more information,
please visit www.agrostore.com.tr

GREENLINE LOJISTIK™

With many years experience and knowledge our welltrained expert staff and constantly renewed fleet of vehicles is providing services such as overland transport, warehousing, and distribution in Asia and Europe to the leading companies of Turkey. GREENLINE LOJISTIK™, which offers the delivery with minimum cost and minimum time with boutique service quality, always prioritizes customer satisfaction.

GENGROUP™

It offers turnkey solutions to our investors. Every point of your greenhouse comes to life with the solutions of the best brands in the world and the knowledge of GENGROUP™.

Since the day we were founded, we aimed to be the symbol of continuity and respectability in the agriculture area of our country and the world, with an environmentally responsible and customer-focused understanding, as well as providing products and services in universal quality standards. We are working together for the best. With the experiences we gained from the different parts of the world, our first goal is to create value for our customers in order to meet the quality they need.

We are aware of the importance of presales consultancy and to accompany our customers after sales. Our biggest goal is to move rapidly towards becoming one of the top 5 companies in the world that are recognized in the sector, as well as being the leader of the sector with the pride of contributing to the economy of our country by producing the equipment needed in the modern greenhouse industry with our factories.

“

If you want your investment to turn into profit as quickly as possible, our expert team is always with you.

”

WE ARE A STRONG TEAM

Creating the right product and the service that will provide maximum benefit starts with the competence and experience of our employees. We don't make compromises on continuous quality and innovation,

providing the desired environments for our employees to benefit from their talents, experiences, strength and creativity, and creating an environment powered by cooperation and solidarity.

World-class production

GENGROUP™ has 13.000 m² of industrial area and a production area equipped with modern equipment for the production of greenhouse systems that comply with all international quality standards. Our machines and equipment include automatic molding, bridge cranes, bending machines, bending presses, profile lines for canal and profile production, presses with automatic loading devices, hydraulic lifts and other equipment.

Quality

From production to assembly, high technology products are used in our facility. Strict controls are carried out during production to achieve the best results and work equality. We understand the importance of developing new technologies used in agriculture, therefore, we work hard in our R&D department to design and develop new models of greenhouses.

Planning, strategy, analysis

Creating an issueless greenhouse production process for the different climates all over the world requires correct planning, analysis and right strategy. All of our facilities have been established by our highly qualified specialists for easy and fast installation of greenhouses. Our experienced engineers are our main advantage.

Work-flow

We create conceptual designs by chronograms, material distribution charts, work progress, and tracking accurate feedback in GENGROUPTM and then we develop, implement and launch the projects of our customers.

Consultancy and support

The experience and professionalism of GENGROUPTM's staff enables us to offer projects suitable for every country, climate zone and agricultural areas. Thus, we offer support and direct advice to customers, independent of third party institutions.

GENGROUP™ OFFERS COMPLETE SOLUTIONS

All systems required for the greenhouse work in full harmony with the right project designing. From the first moment to the last, the whole project proceeds under the control of GENGROUP™.

Construction

All products required for construction are produced in our factories under the supervision of our experts. Thanks to the steel construction structure calculated with SAP2000, our greenhouses resistant to the most difficult climatic conditions comply with TS EN 13031-1 standards

Climatization

You can ensure an efficient harmony between all climatic factors with climatization automation. Intelligent control software and precision sensors enable all of the climatization process including heating, shading, ventilation, and lighting to interoperate perfectly. Climatization takes into account not only the current weather but also the weather forecast.

Water Management

The irrigation system in the greenhouse is similar to the blood circulation of living beings. It is vital. They should work together neatly just like arteries and veins of a living being. The management of the quality and the quantity of water guarantees controlled and efficient production. In addition, good fertilization and nutrification can only be achieved through a perfect irrigation system.

GENGROUP™ AROUND THE WORLD

GENGROUP™'s has successfully completed giant greenhouse projects not only in Turkey, in very different parts of the world.

Logistics

As part of the turnkey solutions we offer, GENGROUPTM stands beside our investors in the logistics section. In order to proceed in the most efficient way, the logistic needs of all the equipment needed in the installation process of the greenhouse are met by us, and the equipment is safely delivered to the greenhouse area.

Supervisor Services

With its expert staff, GENGROUPTM guarantees investors to get the highest efficiency from greenhouses. From the installation to the delivery of the greenhouse, our expert supervisors take their place in the field, follow the process closely and work for the perfect results. The most reliable solutions are created by our supervisors for problems that may arise for any reason. By this means, the greenhouse is set up and delivered to our investors with expert knowledge

GENGROUP™

WHAT DOES GENGROUP™ DO?

We strive to create value for our country and meet the quality demands of our investors, with the experiences we have gained in different parts of the world. GENGROUP™ is always with you, from the process of designing the project to the harvesting.

Some of our completed projects

AGROLAND AZERBAIJAN

It is the largest greenhouse project located in Azerbaijan. Turnkey gothic greenhouse made by us.

556.800 square meter

BINEAGRO AZERBAIJAN

It was completed in two stages. In this gothic greenhouse many different vegetables can be grown, especially tomatoes.

328.320 square meter

AGROBRIDGE AZERBAIJAN

It is a greenhouse project located in Turkmenistan. Turnkey gothic greenhouse was built by us in 2018.

98.528 square meter

GAMI TURKMENISTAN

It is a greenhouse project located in Turkmenistan. Turnkey gothic greenhouse was built by us in 2018.

63.120 square meter

Some of our completed projects

ZIRE AZERBAIJAN

It is a greenhouse project located in Azerbaijan. Turnkey gothic greenhouse was built by us in 2020.

254.160 square meter

ERKBY TARIM TURKEY

It is the largest greenhouse in Konya. The turnkey delivery of the gothic greenhouse made by us in 2019.

105.552 square meter

NETGREEN TURKEY

It is the largest greenhouse in Sivas. The turnkey delivery of the geothermal heated glass greenhouse was made by us in 2020.

38.100 square meter

ZNP TURKEY

It is the largest greenhouse in Inegöl. Gothic greenhouse heated with geothermal and biomass fuel was put into service in 2020.

46.368 square meter

We Produce Solutions for the Leaders of the Industry

YÜKSEL TOHUM, a leader brand in global seed production, chose GENGROUPTM technology for modern greenhouse investments.

We produced special solutions for Yeditepe University Biogenetic R&D greenhouses.

You can find some of our completed and ongoing projects.
